

National Diagnostic  
IMAGING

NAME: PATIENT NUMBER:  
REF. PHYSICIAN: STUDY DATE: 1/5/2016  
DATE OF BIRTH: GENDER: F  
EXAM: Renal Ultrasound  
CLINICAL HISTORY: Hematuria, Glomerulonephritis

Renal ultrasound:

INDICATIONS: Pain, renal tumor.

FINDINGS: Selected static sonographic images of the visualized kidneys shows the right kidney to measure 10.2 x 3.8 x 2.2 cm. There is some linear echogenicity in the lateral cortex which could represent scarring. The cortex is 1 cm. There is no hydronephrosis, nephrolithiasis or mass seen.

The left kidney measures 9.7 x 2.9 x 3.8 cm. The cortex is 1 cm and appears unremarkable. There may also be some element of cortical scarring.

The visualized urinary bladder appears unremarkable.

IMPRESSION: Possible scarring of the renal cortex without acute pathology. There is no hydronephrosis, nephrolithiasis or mass.

D. H. Berns, M.D.
